

# TEAM 5 DRONES

## Unmanned Aerial Systems (UAS) Team5 Drone (UAS) Division

Team5 is the only outfit that reliably offers a seamless transition between full-size aircraft and drones, with experienced operators in each specialty. We maintain the same exacting standards with our drone division as more complex productions: Our crew deploys cutting-edge, custom gear operated by a highly qualified team that includes a licensed drone pilot with motion picture aviation expertise to guide the operation, an experienced drone camera operator, and a specialized technician. The result is precision drone cinematography that combines the latest technologies with the highest degree of established set practices and safety procedures.

### Team5 Drone System Features

- FAA exempted entity listed with the CA Film Commission and Film LA
